## PARTNERSHIP ACCOUNTS

Definition: The partnership Act 1932 defines partnership as the relationship between person who has agreed to share the profit of a business carried on by all or any of them acting for all.

Partnership deed: It is a written document which contains the terms and conditions regarding the conduct of partnership business.

It may include the name of the firm, the nature of business, the amount of capital and the partners share, the amount a partner can drawn, share of profit and loss, interest on capital, duration of the firm, terms and condition for admission, retirement or death of partner, salary payable to partners, how to prepare annual accounts of the firm, loan extended by partners in addition to capital, what is to be done in the case of insolvency, in case of dispute how it should be settled and other clause.
Rules as per Act: In case, if the firm doesn't have any deed, then the provisions as provided in the Partnership Act 1932 should be followed. Accordingly,

Profit and losses of the firm must be shared equally
Interest on capital normally not allowed, if allowed only out of profits
If any partner extended loan in addition to capital, then $6 \%$ interest can be paid.

No salary or remuneration to partners.
Every partner must participate in the management of the business
No person shall be admitted without the consent of all existing partners
The partnership accounts are to be kept at the place of business of the firm and every member may have access to and inspect copy of them.
Profit and loss appropriation account:
As the partnership Act says interest on capital and other things are to be provided out of profit only, it is necessary to prepare the profit and loss appropriation account to give effect for

Interest on capital, interest on drawings, salary to partners and share of profit among partners equally or according to the agreed ratio.
Capital Account: In case of partnership firm, the capital account of the partners may be either fixed or fluctuating capital.
Fixed capital: In this case, the capital of the partners should be kept as it is and all the other adjustment such as interest on capital, interest drawings, etc will be done in a separate account called current account.
Fluctuating capital: All adjustment regarding profit, share of other income, interest on drawings and interest on capital will be recorded in one capital account.
On $1^{\text {st }}$ January 2006, A,B and C enter into partnership contributing Rs.250000, Rs. 130000 and Rs. 120000 respectively and sharing profit in the ratio of $5: 3: 2$. B and C entitled to a salary of Rs. 16000 and Rs. 14500 respectively per year. Interest on capitals is to be allowed at 5\% per annum. 10\% interest is to be charged on drawings. During the year A withdrew Rs. 40000 on 01/04/06, B Rs. 25000 on 01/07/06 and C Rs. 15000 on 01/10/06. Profit before above
mentioned adjustments was Rs.71500. Show how the profit is distributed and also prepare the capital account (a) if they are fluctuating and (b) if they are fixed.

Profit and loss Appropriation Account

| To Interest on capital A 12500 | 25000 | By Net profit | 71500 |
| :---: | :---: | :---: | :---: |
| $\begin{array}{lr}\text { To partners salary } & \text { A } 16000 \\ & \text { B } 14500\end{array}$ | 30500 | By Interest on drawing <br> A 2000 <br> B 1250 <br> C 750 | 4000 |
| To Partner A 10000 <br> B 6000 <br> C 4000 | 20000 |  |  |
|  | 75500 |  | 75500 |

If capital is fluctuating:
Partners Capital Account

|  | A | B | C |  | A | B | C |
| :--- | ---: | ---: | ---: | :--- | ---: | ---: | ---: |

| To B c/d | --- | 2250 | 8750 | By profit | 10000 | 6000 | 4000 |
|  |  |  |  | By Bc/d | 19500 | --- | --- |
|  | 42000 | 28500 | 24500 |  | 42000 | 28500 | 24500 |

Minor partner: A minor can be admitted into the firm with the consent of all partners. A minor partner is not personally liable for the firm's debt but his share in the partnership property and profit can be utilized to set off the losses of firm. Within six months of attaining the age of major, he must give public notice that he doesn't want to continue as a partner otherwise he will be deemed to have elected as partner and held liable personally for the losses of the firm.

Guaranteed profit: Sometime, a partner may be admitted with a guaranteed profit. The guaranteed profit will be paid even if there are no profits or his share of profit falls short of the guaranteed amount. The guarantee may be given by one of the existing partners or the entire existing partners.

In case of partnership firm, the final accounts are prepared in the following manner:
1] Trading account
2] Profit and loss account
3] Profit and loss appropriation account
4] Partners capital account - fluctuating - capital account
Fixed - capital account and current account
5] Balance sheet.
Change in the partnership firm: Over a period of time, there may be lot of changes in the partnership firm. It may be in the form of admission of new partner, retirement of existing partners or any partner may expired or by any other reason whatsoever. Hence, it is important to give effect to the above change in the books of accounts which is the ultimate challenges in the partnership accounts.

## ADMISSION OF NEW PARTNER

A partner may be newly admitted into existing firm to bring further capital or new talent or managerial skill. The terms on which a new partner is admitted must be fair to both new and existing partner. When a person is newly admitted he acquires - right in the share of the profits of the business

Right in the assets and liabilities of the business.
Therefore, when a new partner is admitted the following adjustments are needed to be carried out

1] Calculation of new profit ratio
2] Revaluation of assets and liabilities
3] Goodwill
4] Adjustment for undistributed profits and losses and
5] Adjustment in the capital.
1] Calculation of new profit ratio: When a new partner is admitted, there is change in the profit sharing ratio of the partner, as the same profit is going to be shared among more person than before the admission. In this case, either one of the existing partner or all the existing partners sacrifice some of their profit, therefore, in case of admission, it is necessary to prepare new ratio and sacrificing ratio.
Aravind and Balu are partners sharing profits and losses in proportion of 2:1. They admitted chandran a new partner whom they give $1 / 6^{\text {th }}$ share in the profits. What is the new profit sharing ratio?
David and Eswar are partners sharing profits and losses in the proportion of 7:5.
They agree to admit Fazil into partnership who is to get $1 / 6^{\text {th }}$ profits. He acquires this share $1 / 24^{\text {th }}$ from David and $1 / 8^{\text {th }}$ from Eswar. What is the new profit sharing ratio?
Ganesh and Hari are partners sharing profits and losses in the ratio of 3:1. They agreed to admit Isaac into the partnership firm. Isaac is given $1 / 4^{\text {th }}$ share of future profits which he acquires in the ratio of 2:1 from the old partners. What is the new profit sharing ratio?
Sacrificing ratio: It is that portion of profit sacrificed by the existing partners in favour of the new partner. Technically, it is the difference between old ratio and new ratio. $\mathbf{S R}=\mathbf{O R}-\mathrm{NR}$.
John and kannan are in partnership sharing profits and losses in the ratio of 3:2. They admitted latif into partnership firm for $1 / 5^{\text {th }}$ share. What is the new ratio and sacrificing ratio?.
2] Revaluation of assets and liabilities: When a new partner is admitted, it is obvious that neither he should be benefited from any appreciation in the value of assets or suffer from any depreciation in the value of assets. Same treatment should be given for liabilities also.

Therefore, the of assets and liabilities should be revalued at the time of admission by opening a revaluation account and any profit or loss on revaluation should be transferred to existing partners capital account in the old profit sharing ratio.

| For increase in the value of assets Assets A/c. <br> To Revaluation A/c. | For decrease in the value of assets Revaluation A/c. <br> To Assets A/c |
| :---: | :---: |
| For decrease in the value of liabilities | For Increase in the value of liabilities |
| Liabilities A/c. <br> To Revaluation A/c. | Revaluation A/c. To Liabilities A/c. |
| For loss on revaluation | For profit on revaluation |
| Partners' capital A/c. | Revaluation $\mathrm{A} / \mathrm{c}$. |

Memorandum revaluation account: Sometimes, the partner may agree to show the assets and liabilities in its original value and also don't want give share to the new partner either in the appreciation or depreciation in the value of assets and liabilities. In that case, instead of revaluation account, memorandum revaluation accounts is prepared and in that account the changes in the value of assets and liabilities are recorded first and then reverse entries (i.e. by debiting what credited and by crediting what debited)are passed but no change will be made in the value of assets and liabilities in Balance sheet.

| For profit on memo revaluation <br> Memo. Revaluation A/c. <br> To Old partners capital A/c(OR) | For reverse entry <br> All partners Capital A/c. (including new <br> partners in new ratio) <br> To memo. Revaluation A/c. |
| :--- | :--- |
| For loss on memo revaluation <br> Old partners capital A/c(OR) <br> To memo. Revaluation A/c. | For reverse entry <br> Memo. Revaluation A/c. <br> To All partners capital A/c. (including <br> new partners in new ratio) |

## Valuation of Goodwill

Average profit method: under this method, the average of the profits last few years is computed and which is multiplied by the number of years in which the anticipated profit will be available.

The following particulars are available in respect of the business carried on by a firm: 2006 loss Rs.5000, 2007 loss Rs.10000, 2008 profit Rs. 75000 and 2009 Profit Rs. 60000 Compute the value of goodwill on the basis of 5 years purchase of average profit of the business.
Good will = Average profit $x$ no of years of profit
$A P=-5000+-10000+75000+60000 / 4=30000 \times 5=150000$
Super profit method: Super profit means the excess profit that can be earned by a firm over and above the normal profit usually earned by similar firms under similar circumstances. Goodwill is computed by multiplying the super profit by certain number of years.

The profits and losses for the last years are 2002 loss Rs.10000, 2003 loss Rs. 25002003 profit Rs. 98000 and 2004 Profit Rs.76000. The average capital employed in the business is Rs.200000. The rate of interest expected from capital invested is $12 \%$. The remuneration of partners is estimated to be Rs. 1000 per month. Calculate the value of goodwill on the basis of two years purchase of super profits based on the average of four years.
Goodwill = super profit x no of years of purchase
Average profit $=-10000+-2500+98000+76000 / 4=40375$
Normal return in the business $=200000 \times 12 / 100=24000$
Super profit $=$ profit - normal return $40375-24000=16375 \times 2=32750 /-$

Capitalisation method: under this method, the average profits are capitalized taking into consideration the normal rate of return in the industry.

The profits for the last three years are 2003 Rs. 42500,2004 Rs. 56000 and 2005 Rs. 68000 . The total liabilities of the firm are Rs. 1000000 of which outsiders liabilities is Rs. 500000 . The rate of interest expected from capital invested is $10 \%$. Calculate the value of goodwill on Capitalisation basis.
Average profit $=42500+56000+68000 / 3=166500 / 3=55500$ $55500 / 10 \times 100=5,55,000-$ capital employed $500000=55000$ goodwill
Treatment of goodwill: The goodwill amount will be treated in the following manner in case of admission of a partner.
A] When the amount for goodwill is paid privately by new partner to old partners, In such cases, it will not be recorded in the books.
B] When goodwill is received in cash and retained in the business. If the new partner brought the money for goodwill then it will be distributed among old partners in their sacrificing ratio.

| For cash brought by new partner <br> Cash A/c. | When transferred to old partner in SR <br> New partner capital A/c. <br> To new partner Capital A/.c |
| :--- | :--- |

C] When goodwill is received in cash and withdrawn by old partners. In this case, first the amount brought in by new partner for goodwill is recorded and transferred to the old partners' capital account in sacrificing ratio. When money withdrawn by them it will also be recorded.

| For cash brought by new partner | When money transferred to old partners A/c. |
| :--- | :--- | Cash A/c. New partner capital A/c. Old partner capital A/c.

For money withdrawn by old partners
Old partners' capital A/c.
Cash A/c.
D] When goodwill raised fully in the books of accounts: in this case, goodwill account is recorded in the books of accounts by passing following journal entry Goodwill A/c.

To Old partners capital A/c. old ratio.
When goodwill is already appearing in the books of accounts then if there is any decrease in the value of goodwill, it will be adjusted in the capital account of old partners by debiting their account and if there is any increase in the value of goodwill, the partners capital account will be credited in their old ratio.

Sunil and Dalip are partners in a firm sharing profits and losses in the ratio of 5:3. Sachin is admitted in the firm for $1 / 5$ share of profits. He is to bring in Rs. 20000 as capital and Rs. 4000 as his share of goodwill. Give the necessary Journal entries (a) when the amount of goodwill is retained in the business (B) When the amount of goodwill is fully withdrawn and (C) when $50 \%$ of the amount of goodwill is fully withdrawn
New Ratio Sachin $1 / 5$ then balance $4 / 5$ Sunil New share $4 / 5 \times 5 / 8=20 / 40$
Dalip's new share $4 / 5 \times 3 / 8=12 / 40$ Sachin $=8 / 40$ 20:12:8 or 5:3:2
Old ratio $5: 3 \quad \mathrm{SR}=\mathrm{OR}-\mathrm{NR}$ Sunil $5 / 8-5 / 10=25-20=5$ Dalip $3 / 8-3 / 10=12-9=3$

| Cash A/c. | 24000 |  |
| :---: | ---: | ---: |
| To Sachin capital A/c. $(20000+4000)$ |  | 24000 |

(a) When goodwill retained in the business

| Sachin capital A/c. | 4000 |  |
| :---: | ---: | ---: |
| To Sunil capital A/c. |  | 2500 |
| To Dalip capital A/c. |  | 00 |
| Amount brought by new partner for goodwill is shared by old partners in SR |  |  |

(b) When amount of goodwill fully withdrawn

| Sachin capital A/c. | 4000 |  |
| :---: | ---: | ---: |
| To Sunil capital A/c. |  | 2500 |
| To Dalip capital A/c. |  | 1500 |
| Amount brought by new partner for goodwill is shared by old partners in SR |  |  |

| Sunil capital A/c. | 2500 |  |
| :---: | ---: | ---: |
| Dalip capital A/c. | 1500 |  |
| To Cash A/c. |  | 4000 |

[c] When $50 \%$ of the amount of goodwill is fully withdrawn

| Sachin capital A/c. | 4000 |  |
| :---: | ---: | ---: |
| To Sunil capital A/c. |  | 2500 |
| To Dalip capital A/c. |  | 1500 |
| Amount brought by new partner for goodwill is shared by old partners in SR |  |  |

| Sunil capital A/c. | 1250 |  |
| :---: | ---: | ---: |
| Dalip capital A/c. | 750 |  |
| To Cash A/c. |  | 2000 |

Hem and Nem are partners in a firm sharing profits in the ratio of 3:2. Their capitals were Rs 80000 and Rs. 50000 respectively. They admitted Sam on $01 / 01 / 2007$ as anew partner for $1 / 5$ share in the future profits. Sam brought Rs. 60000 as his capital. Calculate the value of goodwill of the firm and record necessary journal entries on Sam's admission.
New ratio $=12: 8: 5$ Sam share is $1 / 5$ balance $1-1 / 5=4 / 5$
Hem new ratio $=4 / 5 \times 3 / 5=12 / 25$ Nem New ratio $=4 / 5 \times 2 / 5=8 / 25$
If Hem and Nem capital $(80000+50000)$ is $130000 / 20(12+8)$ for a share of 20 then Sam capital for 5 share should be 130000/20 x $5=32500 \mathrm{He}$ brings Rs. 60000 as his capital i.e. means the extra amount of Rs.27500(60000-32500) is his share of goodwill.
Rs. 27500 is for 5 share then the total value of goodwill is $27500 / 5 \times 25=137500$

4] Adjustment of undistributed profit and losses: at the time of admission of new partners, if there is any undistributed profit kept in the name of general reserve or profit and loss account, it should be transferred to capital account of the old partners in their old ratio. In case if there is any loss which should also be transferred to partners' capital account.

For profit, general reserve (transfer ) General reserve A/c.

To Old partners capital Ac.

For accumulated loss
Old partners' capital A/c.
To Accumulated losses A/c.

The following is the balance sheet of Ram and Mohan (who share profits in the ratio of 3:2) as on $1^{\text {st }}$ January 2009

| Liabilities |  | Assets |  |
| :--- | ---: | :--- | ---: |
| Sundry creditors | 15000 | Buildings | 18000 |
| Ram's capital | 20000 | Plant and machinery | 15000 |
| Mohan's capital | 25000 | Stock | 12000 |
| General reserve | 15000 | Debtors | 10000 |
|  |  | Investments | 15000 |
|  |  | Bank | 5000 |
|  | 75000 |  | 75000 |

On this date shyam was admitted on the following:
He is to pay Rs. 25000 as his capital and Rs. 10000 as his share of goodwill for one fifth share of profits.
The assets are revalued as building 25000, Plant and machinery 12000 stock 12000, debtors 9500.
It was found that there was a liability for 1500 for good received but not recorded in books. Prepare new balance after the admission of Shyam.

New profit sharing ratio $=$ Shyam $1 / 5$ balance $1-1 / 5=4 / 5$
Ram's new ratio $=4 / 5 \times 3 / 5=12 / 25$ Mohan's New ratio $=4 / 5 \times 2 / 5=8 / 25$
New Ratio = 12:8:5
Old Ratio = 3:2
Sacrificing ratio for Ram $=O R-N R 3 / 5-12 / 25=15-12=3$
Sacrificing ratio for Mohan $=O R-N R 2 / 5-8 / 25=10-8=2$

| Cash A/c. | 25000 |  |
| :---: | ---: | ---: |
| To Shyam's capital A/c. |  | 25000 |

| :--- | ---: | :--- | ---: |
|  |  | Bank(5000+35000) | 40000 |
|  | 113500 |  | 113500 |

## 5. Adjusting capital in proportion to profit sharing ratio

The following is the balance of $A, B$ and $C$ sharing profits and losses in the proportion of 6:5:3 respectively

| Liabilities |  | Assets |  |
| :--- | ---: | :--- | ---: |
| Sundry creditors | 18900 | Cash | 1890 |
| Bills payable | 6300 | Debtors | 26460 |
| General reserve | 10500 | Stock | 29400 |
| A's capital | 35400 | Furniture | 7350 |
| B's Capital | 29850 | Land and building | 45150 |
| C's Capital | 14550 | Goodwill | 5250 |
|  | 115500 |  | 115500 |

They agreed to take $D$ into partnership and give him $1 / 8^{\text {th }}$ share on the following terms:
Furniture to be depreciated by 920 , Stock to be depreciated $10 \%$, Value of land and building appreciated to 59850, value of goodwill brought upto Rs. 14070 D should then bring in Rs. 14700 as his capital.
That after making the above adjustments the capital accounts of the old partners be adjusted on the basis of the proportion of D's capital to his share in the business i.e. actual cash to paid off or bought in by the old partners as the case may be. Prepare revaluation account, partners' capital account and balance sheet of the new firm.
D's share $=1 / 8$ Balance $1-1 /=7 / 8$
New ratio $A=7 / 8 \times 6 / 14=42 / 112 \quad B=7 / 8 \times 5 / 14=35 / 112 C=7 / 8 \times 3 / 14=21 / 112$
D's share convert to $112=14 / 112$ New Ratio $=42: 35: 21: 14$ or $6: 5: 3: 2$

| Cash A/c. | 14700 |  |
| :---: | ---: | ---: |
| To D's capital A/c. |  | 14700 |

| General Reserve A/c. |  | 10500 |
| :---: | ---: | ---: |
| To A's capital A/c. |  | 4500 |
| To B's capital A/c. |  | 3750 |
| To C's Capital A/c. |  | 2250 |

| Land and Building A/c. | 14700 |  |
| :---: | ---: | ---: |

## RETIRMENT OF A PARTNER

When a partner retires from the firm due to ill health or old age, as per the agreement, it is necessary to make adjustments in the books of account for the following:
Revaluation of assets and liabilities
Treatment of goodwill and calculation of gaining ratio
Treatment of undistributed profit and losses
Calculation of amount payable to the retiring partner

Adjustment of capital accounts
Settlement of the total amount due to the retiring partner.

## Treatment of good will:

1] when raised in the books at full value
Goodwill A/c.
To all partners capital A/c.

2a] When raised in the books Goodwill A/c.
To all partners capital A/c.
3a] raised only for share of retiring partner Goodwill A/c.

To Retiring partners capital $A / c$.

2b] For writing off the goodwill
Remaining partners' capital A/c.(GR) To Goodwill A/c.
3b] When written off
Remaining partners' capital A/c.(GR)
To Goodwill A/c.

Gaining ratio: After retirement of a particular partner, the profit is going to be shared by the remaining partners only. If suppose, there are three partners and one retire means, the remaining two will have to share the profits. Naturally the remaining partners gaining something and if that is represented in the form of ratio, it is called gaining ratio.
Gaining ratio (GR) = New ratio (NR) - Old ratio (OR)
Settlement of amount due to retiring partner: If necessary funds available in the business, his amount may be settled immediately after retirement. If no sufficient funds available, then the amount payable to the retiring partner may be transferred to his loan account for which the firm has to be pay interest.

On $31^{\text {st }}$ march 2005, the balance sheet of $\mathrm{M} / \mathrm{s}$. $\mathrm{A}, \mathrm{B}$ and C sharing profits and losses in proportion to their capitals, stood as follows

| Liabilities |  | Assets |  |
| :--- | :--- | :--- | :--- |
| Sundry creditors | 100000 | Land and buildings | 200000 |
| Capital accounts A | 200000 | Machinery | 300000 |
| Capital accounts B | 300000 | Stock | 100000 |
| Capital accounts C | 200000 | Sundry debtors | 100000 |
|  |  | Cash and bank balances | 100000 |
|  | 800000 |  | 800000 |

On $31^{\text {st }}$ march 2005, A desired to retire from the firm and the remaining partners decided to carry on. It was agreed to revalue the assets and liabilities on that date on the following basis
Land and building be appreciated by 30\%, machinery be depreciated by $20 \%$ closing stock to be valued at Rs.75000, provision for bad debts to be made at $5 \%$ Old credit balances of sundry creditors Rs. 20000 to be written back. Joint life policy of the partners surrendered and cash obtained Rs. 80000 Goodwill of the entire firm be valued at Rs. 140000 and A share of the goodwill be adjusted in the accounts of B and C who share the future profits equally. No goodwill account being raised.

After retirement A's account is settled as $50 \%$ on retirement and $50 \%$ within one, year.
Prepare revaluation account, partners' capital account and balance sheet after retirement.
Old Ratio = 2:3:2 New Ratio = 1:1

| Land and Building A/c. | 60000 |  |
| :--- | ---: | ---: |

## DISSOLUTION OF PARTNERSHIP

There is a difference between dissolution of firm and dissolution of partnership. Dissolution of partnership means one partner may resign, or retire or died or become insolvent, in that case the relationship between partners is dissolved and new relationship may emerge if they admit new partner.

Dissolution of firm means complete breakdown of the partnership firm and there is no more business. In such case, all the assets of the business should be sold and all the liabilities should be settled and the accounts in the firm should be closed.

## Modes of dissolution

There are different ways in which a firm may be dissolved.
1] Dissolution by agreement
2] Dissolution on the happening of contingencies - expiry of term, job, etc
3] Dissolution by notice of partnership at will
4] Compulsory dissolution or dissolution by the operation of law
5] Dissolution by the court.
Accounting treatment: When there is dissolution, the assets of the business should be sold first and amount due to creditors to be paid and if there exist any surplus which will be paid and if there is any shortage that should be settled by the partners. For this purpose, we have to prepare Realisation of account, partners' capital account and cash account.

For closing the assets except cash Realisation A/c.

For closing the liabilities account Liabilities A/c

| To Assets A/c. (Book Value) | To Realisation A/c. |
| :---: | :---: |
| If any assets taken over by partners Partners' capital A/c. To Assets A/c. | If any liabilities taken over by partners Liabilities A/c. <br> To partners capital A/c. |
| For realizing the assets ( by selling) Cash A/c. <br> To Realisation A/c. | For payment of liabilities Realisation A/c. To cash A/c. |
| Expenses on Realisation Realisation A/c. To Cash A/c. | If expenses borne by the partners Realisation A/c. To partners capital A/c. |
| For profit on realisation Realisation A/c. To Partners capital A/c. | For loss on realisation Partners' capital A/c. To Realisation A/c. |
| Order of settlement: First outside liabilities, then partners' loan account, if excess fund available then partners capital account |  |

Jyothi and vikas was equal partner in a manufacturing business. On June 30 2006, they dissolved the firm on which date their balance sheet was as follows:

| Liabilities |  | Assets |  |
| :--- | ---: | :--- | ---: |
| $\begin{array}{l}\text { Creditors } \\ 28000 \\ \text { Less } \\ 1000\end{array}$ | 27000 | $\begin{array}{l}\text { Debtors 42000 } \\ \text { Less: } \\ 2000\end{array}$ | 40000 |
| Reserve for contingencies |  | 5000 | Stock |$]$

Stock, debtors, plant and machinery and goodwill realised Rs.27000, Rs. 38000 , Rs. 20000 and Rs. 5000 respectively. Furniture did not realise any value. An amount of Rs. 6000 was paid on account of contingent liabilities. The expenses of realisation were Rs. 1000

The firm had previously made some investments in share of a joint stock company and had written off this investment on finding it useless. The investment now realised Rs. 1500 .

Insolvency of partner: If the firm at the time of dissolution has enough funds to settle all dues then insolvency a particular partner doesn't have much impact. But when the firm has to be settle the accounts of outsiders and any partner become insolvent, then it is necessary to follow Garner Vs. Murray rule.

Accordingly, if any partner is insolvent and then the deficiency caused by the insolvent partners has to be borne by the remaining solvent partner in proportion to the capital before dissolution.
The following is the balance sheet of a firm as on 31/12/2007

| Liabilities |  | Assets |  |
| :--- | ---: | :--- | ---: |
| Creditors | 204800 | Bank | 11000 |
| P Loan A/c. | 60000 | Debtors | 192120 |
